

## Result framework - overview and examples

	Specific objective	Result indicator	Output indicator
<i>What is it?</i>	Description of the change you want to achieve in the existing situation: <b>the intended result</b>	A variable that describes a relevant aspect of your intended result, to <b>measure the change in the situation</b>	A variable that describes the outputs that your action plan will produce. Outputs are the direct <b>products created by the implementation of your action plan</b>
<i>Your Examples</i>
